Job Description: Junior ASP.Net Developer and Software Support Analyst

Who We Are

Kim Technologies is an award-winning Platform-as-a-Service provider of an enterprise class Case, Document and Workflow Management platform that leverages Artificial Intelligence capabilities. Our software is applicable to a wide range of business functions, although our strongest initial traction has been within the legal sector, where we have a number of Global 500 clients spanning 37 countries. We are headquartered in Bridgewater, NJ with operations in the United States and United Kingdom.

The Role

Due to ongoing rapid expansion, we are looking to hire quickly a motivated, results-oriented, and reliable resource as a Junior .NET Developer and Software Support Analyst. Previous experience developing on the .NET stack, as well as interfacing with customers, is a must. This is a perfect opportunity for someone with prior experience with software development and production support who wishes to expand upon their skillsets. You will be joining a high-caliber team with significant opportunities to grow within the company. Excellent benefits.

Responsibilities

- Communicate with power users and configurators from outside the company to help troubleshoot potential software or configuration issues.
- Develop fixes for bugs and functional improvements.
- Develop new code enhancements.
- Supports software programming applications and components
- Document new and existing system processes.
- Document release notes of new features and fixes.
- Provide daily status of all open issues with development support manager.
- Communicate status of pertinent open issues with customer directors, when needed.

Technical Requirements

- Prior development experience as a junior developer, with an emphasis on the C#, ASP.NET, SQL Server stack. Prior HTML, CSS, JavaScript experience is required.
- Prior experience working in software production support.
- Excellent verbal and written communication skills.
- Excellent interpersonal and customer service skills.
- Ability to see the "big picture", especially when troubleshooting customer issues.
- Strong analytical and problem-solving skills.
- Proficient with MS Azure DevOps.
- Proficient with MS Teams, MS Office.

Nice to Have

- Prior experience with SAML / SSO.
- Prior experience developing MS Office Add-in software.
- Entity Framework, v6 or higher.
- Familiarity with REST API services.

Qualifications

- Bachelor's degree, or equivalent experience (Required).
- U.S. work authorization (Required).
- Experience providing software production support 2 years minimum (Required).
- Previous development experience/knowledge of ASP.NET, C#, HTML, SQL Server, JavaScript – 3 years minimum (Required).
- Excellent communication skills, prior experience writing product documentation (Required).
- Results-oriented personality (Required).
- Ability to work multiple projects concurrently (Required).

Job Type: Full-time

Salary: $50,000.00 - $65,000.00 per year

COVID-19 considerations: Permanently Remote

NOTE: We cannot sponsor H1b Visas at this time.

Third Party Agencies need not apply.
